

How Does it Work?

It's just a **one-time setup**, and the escalator is sanitized for no less than a year with **no maintenance**.

To sanitize the escalator handrails, we use high UVC light (50 MJ/cm²) at high speeds (1.0 m/s). Escalator handrails are sanitized efficiently and are environmentally friendly thanks to the physical sanitization process that uses UVC lighting technology.

Stay Safe with BrigidBox Escalator and Travelator Handrail Sanitization!

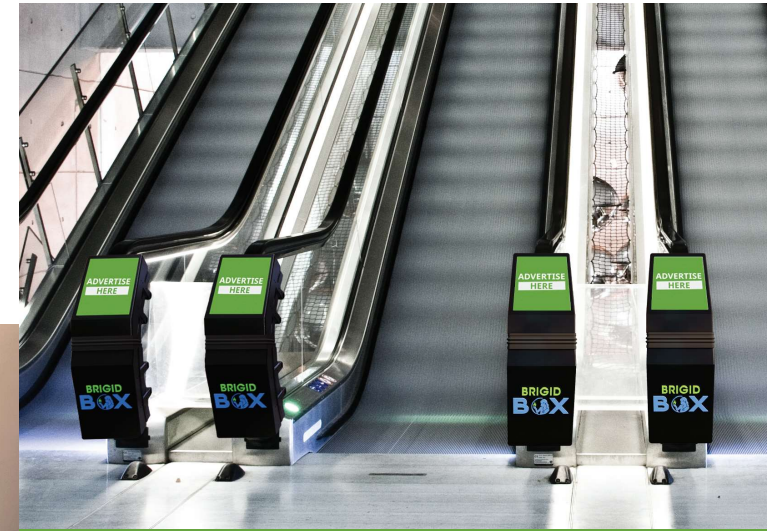

Public areas with dense passenger flow are fast channels for spreading viruses and bacteria

“Each year, escalators are used by more than **105 billion people**. Every hour, over **30,000 people** ride escalators around the world!”

ESCALATOR AND TRAVELATOR HANDRAIL SANITIZATION

MADE IN GERMANY

BrigidBox KPIs

Expertise & Competence

Our innovations have existed for a long time. This has demonstrated proven experience in the industry, unique in its length and has given us unsurpassed know-how.

Trustworthy

We work hard to earn your trust, every day.

Guaranteed Satisfaction

A positive approach to all our customers' inquiries before and after installation.

Our innovative device is compatible with digital signage software and can be adjusted or modified to fit any escalator thanks to its «Patent» auto-adjust chassis.

BrigidBox Escalator Handrail Sanitizer Plus

1. **Effective sanitization** for escalator handrails
2. **Simple**, easy to install
3. **Auto operation**, long lamp life of 13,000 hours
4. **12.1"** display
5. **Externally** installed

Introducing Escalator AdScreen!

Displaying directions, gates, utilities, or even advertisements across the elevator screen with a **single click!**
